Pigeon Control Services 021 447 3578

[www.pigeoncontrol.co.za](http://www.pigeoncontrol.co.za)

Pigeon Control Services specializes in the fumigation for lice, fleas, mites and other bird borne pests.

We perform space fumigation in attics, stores, warehouses, ships etc.

Fumigation needs to be done in a closed space and the area must be vacated and remain closed for a minimum of six hours after fumigation has taken place.

The fumigation chemicals we use depending on the requirements are Dichlorvos, D-tetrametrin, Cyphenothrin and Pyriproxfen.

Fumigation charges are based on the volume of the area to be treated.

Contact us for more details.
